

DVDirect™

VRD-MC5: THE ONLY DVD BURNER YOU NEED

Relive all your memories in digital perfection with DVDDirect VRD-MC5. The DVD recorder connects with virtually any camcorder or digital camera, and transfers your precious home movies and photos into DVD – without a PC! It's fast, easy-to-use and even supports the high definition AVCHD format. Plus, you get to keep your memories in compact DVDs that are easy to store and catalogue.

3 SIMPLE STEPS TO A DIGITAL REVOLUTION

Transfer your videos and photos directly into DVD. Connect your camcorder, VCR or Digital Video Recorder to the video inputs on one side of the VRD-MC5 for instant recording of video to DVD. Or you can insert your digital camera memory card into the appropriate card slots on the other side to transfer your photos to DVD. DVDDirect records on **DVD-R/VR/R+R/RW** and even **DVD-R DL (Double layer)*** discs.

* Only for Double-layer input recording

Create your DVDs by pressing Record. The large **2.5" colour LCD screen** displays a simple navigation menu that takes you through every step. You can preview the video or view up to **6 digital pictures** at a time. You can even create titles and chapters instantly on your DVD, complete with a thumbnail image of each one.

DVDirect VRD-MC5 supports **16:9 Wide Aspect Ratio** and **Dolby® Digital 5.1 channel surround sound** to take full advantage of today's advanced camcorders.

Enjoy and share your videos and photos with your loved ones on a big screen LCD TV in the living room. You can even assemble your photos into a slideshow with pre-set music or your own MP3 tunes. If your friends and family love what they see, you can make instant copies of the DVD by connecting DVDDirect to your PC (Windows® XP/2000 compatible). You can also print photos directly from the DVDirect to a PictBridge™ compatible photo printer.
